PROFESSIONAL EXPERIENCE

Hashmesh Labs Remote
Full Stack Developer 09/2021 – 09/2022
Technologies: TypeScript, Node.js, GraphQL, Express, React, Tailwind, Jest, Puppeteer, HTML, CSS, Vercel
▪ Collaborated on 2 production applications, 4 startup web apps, 2 JavaScript libraries, and 2 REST APIs
▪ Created a gateway API that decreased queries and endpoints on the front end by 5 times
▪ Integrated Google Analytics into 2 applications
▪ Responsible for managing CI/CD pipeline and deployment, as well as NPM version updates
▪ Implemented end to end testing on front end applications, and unit + integration tests on libraries and APIs

Montclair Bronze Montclair, California
Computer Numerical Control Programmer 09/2019 – 08/2020
Technologies: G-code, Autodesk Fusion 360, CNC technology
▪ Created 3D models from 2D blueprints for over 20 production parts
▪ Optimized programs to be on average 25% faster with generated toolpaths instead of legacy handwritten code
▪ Organized anonymous directories into intelligible file structures, reducing duplicate code by over 40%
▪ Trained new employees on machine operation and setup

2016-2019: Worked in composite and metal manufacturing. Certified machinist for 2 years. Learned leadership and collaboration skills.

PROJECTS

Periodic Tables 07/2021 – Current
Technologies: JavaScript, HTML, CSS, Bootstrap, Express, Node, Vercel, Heroku-Postgres
▪ Built a proof of concept web app to manage tables and reservations for a restaurant as a bootcamp capstone
▪ GitHub: <https://github.com/keithfrazier98/periodic-tables-monorepo>

GrubDash 06/2021 – Current
Technologies: JavaScript, HTML, React, Express, Jest, Vercel
▪ Built an API for food delivery applications to get and create data for user orders and restaurant meals.
▪ GitHub: <https://github.com/keithfrazier98/grubdash-api>

EDUCATION & ACCREDITATIONS

Thinkful 01/2021 – 07/2021
▪ Learned industry-standard languages, frameworks, libraries, and methodologies
▪ Studied data structures and algorithms, asymptotic analysis, and Big O notation
