EXPERIENCE

Front-End Developer
Hashmesh Labs | Sep 2021 - Present
- Built a React front-end for Datapolis.city and contributed to the Datax.js middleware before launching in February of 2022.
- Implemented end-to-end testing for Datapolis using Jest and Puppeteer.
- Integrated Google Analytics 4 in multiple front-end applications.
- Combined 5 Ocean Protocol Subgraphs into a unified gateway using schema stitching, reducing the number of queries and endpoints to manage on front-end applications.
- Created a pathfinder program to find and store trading paths between cryptocurrencies to allow the trade of tokens that don't directly share a liquidity pool, and automated this process with GitHub Actions.
- Created a cryptocurrency list program that regularly curates datatoken lists by creating a script that queries Ocean Protocol Subgraphs, filters the data against DataX criteria, and posts them to GitHub. This process is also automated using GitHub Actions.

PROJECTS

Portfolio | **Personal Project** | Oct 2021 - Nov 2021
- Front-end React application, displaying past projects, GitHub information, contact information, and more
- Used Tailwind CSS for all styling
- Used graphql-request, graphql, and react-query, to handle and cache requests to GitHubs GraphQL API for project information

Devvy | **Chingu Voyage 34** | Oct 2021 - Nov 2021
- Assisted in building Devvy, an Instagram-inspired social platform for developers. Worked with a team of two other developers, pair programmed when necessary, and attended twice weekly meetings concerning production.
- Built the front-end of Devvy using Svelte and Svelte-Kit.
- Wrote GraphQL queries and mutations to fetch and update user information on the backend

EDUCATION

Thinkful | 2020 - 2021
Certification | Full Stack Development
- In-depth application of industry-standard frameworks, APIs, and languages.
- Learned JavaScript, HTML, CSS, SQL, Express.js, React, Mocha/Chai, Bootstrap
- Teaches adaptive learning and how to solve problems with research
- Learned to conduct asymptotic analysis on the implementation of DSA
